Do you have type 2 diabetes?

Would you consider taking part in a clinical research study to improve treatment options for patients like you around the world?

NN1436-4383 is a clinical research study evaluating a new diabetes treatment.

You may qualify if you:

- Are between 18 and 75 years of age
- Have been diagnosed with type 2 diabetes for at least 180 days
- Are currently treated with metformin alone or metformin and DPP-4 inhibitors [adapt naming as appropriate]
- Are able to attend 16 clinic visits and answer 14 phone contact over an 8 months period with weekly frequency

What are the benefits of being involved in the study?

- Comprehensive care, including regular health checks and medical testing
- Access to study medication and blood sugar testing equipment

This clinical research study is currently recruiting volunteers.
